

SERENITY

TREATMENT AFTERCARE

SUNEKOS

What can I expect from my Sunekos treatment:

- You will have a series of small injections in the area to be treated. You may experience a small itchy feeling in the area but this will subside quickly.
- Immediately after, there will be small lumps where the product has been injected; they will look like a mild stinging nettle rash and this will go down after around 30 minutes but can persist for up to 24 hours.
- We advise you do not put any products (including makeup) over the area treated for at least 24 hours.
- To achieve the results, you will 3-4 Sunekos treatments 1 weeks apart initially. Your results will then last 6-9 months depending on the level of correction needed and patient lifestyle.
- You can resume most activities immediately although you MUST avoid swimming for 48 hours and extreme temperatures for 7 days (steam room/sauna/sun/sunbeds)
- Your practitioner will give your aftercare advice and will book you for your following dose which will be 1 week apart.
- Sunekos consists of 3-4 treatments, 1 weeks apart. You will notice improvement in the treated area after your first treatment, however your full results will not be seen until your course is complete.
- You can only undertake injectable procedures like Sunekos after you attend a face-to-face consultation with Anna, who will discuss a full list of cautions and contraindications.

What to expect after your SUNEKOS treatment:

- No makeup for 24 hours after treatment
- Refrain from any facials for two weeks
- No heavy exercise for 24 hours after treatment
- Mild bruising can occur at the injection site
- Be gentle when washing the filled area of your face or neck.
- Avoid massaging or unnecessary touching of your face for the first 24 hours after treatment
